

Appln. No. 10/016,068
Amdt. date September 5, 2003
Reply to Office action of March 6, 2003

REMARKS/ARGUMENTS

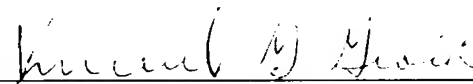

The Office action dated March 6, 2003 has been reviewed and the comments therein carefully considered. In the Office action, various questions and issues are raised concerning the description of the new variety. By the accompanying Substitute Specification, Applicant has made a *bona fide* attempt to address all these issues and questions with information available.

In view of the foregoing amendment and remarks, it is respectfully submitted that the application is now in condition for allowance and, accordingly, reconsideration and allowance are earnestly solicited. If any questions remain regarding the allowability of the application, the Examiner is invited to contact the undersigned at the telephone number indicated below.

Respectfully submitted,

CHRISTIE, PARKER & HALE, LLP

HYBRID TEA ROSE PLANT NAMED 'FRIVOLOUS PINK'

5 CLASSIFICATION

The present invention relates to a new *Rosaceae* plant.

VARIETY DENOMINATION

10 The new plant has the varietal denomination 'FRIVOLOUS
PINK'.

BACKGROUND OF THE INVENTION

15 The present invention relates to a new and distinct variety
of rose plant of the hybrid tea rose of the genus *Rosaceae* which
was created by crossing as seed and pollen parents two (2)
unknown rose varieties. The varietal denomination of the new
variety is 'FRIVOLOUS PINK'.

SUMMARY OF THE INVENTION

20 Among the novel characteristics possessed by this new
variety which distinguishes it from other varieties of which I
am aware, is its pink flowers.

25 Asexual reproduction by propagation by budding of the new
variety as performed in Wasco, California shows that the
foregoing and other distinguishing characteristics come true to
form and are established and transmitted through succeeding
propagations.
